Skills:

HTML5

JavaScript

CSS3

Flexbox

Bootstrap

jQuery

Angular.js

Node.js

Express

PostgreSQL

Knex

Git

GitHub

Jasmine

Mocha/chai

Ajax

Command Line Interface

Heroku

Firebase

Concepts:

Test Driven Development

Responsive Design

Quality Assurance

Paired Programming

Agile Workflow

Data Modeling

Projects:

Outside4life:

This is a project my group and I did for avid4.com, they are a non-profit organization that encourages kids to go outside and be active. Our app allows parents to log in with Facebook and post activities that their kids have done. The kids receive points corresponding to the number of hours spent outside and they can earn various prizes for having a certain amount of points.

Technologies Used: Node.js, Express, Knex, PostgreSQL Bootstrap, JS, Angular.js, Oauth

URL: <http://active4life.herokuapp.com>

Repo: <https://github.com/cspan00/ActivityTracker>

MEAN Tea App:

A shopping cart app for tea. Allows you to select from a list of teas, choose a quantity and add the selected tea to your cart. There is a checkout button that takes you to another page that shows the items in your cart as well as the total amount do. You can edit the quantity of and/ or delete a particular tea on this page and the total will automatically update.

Technologies Used: Bootstrap, Angular.js, JavaScript

URL: <https://scott-shopping-cart.firebaseio.com/#/home>

Repo: https://github.com/scottmc526/angular_pt2/tree/master/shopping_cart

Bucket List:

This app allows a user to log on and create a list of things they would like to do before they die, aka a bucket list. Users can create a list item, add a title, description and picture. Users can also view other bucket lists on the home page or on a users profile page.

Technologies Used: SASS, JavaScript, Knex, PostgreSQL, Express, Node, Oauth, Bcrypt

URL: <https://tranquil-crag-37853.herokuapp.com>

Repo: <https://github.com/tsmit291/bucketlist>
